

## **EH-1 Enclosed Trailer Tool Storage System Instructions**

Thank you for purchasing a TrimmerTrap product. The EH-1's individual modular parts allow you the flexibility to customize tool storage in your enclosed truck, trailer or even the shop. Thought should be given as to how and where to install the different parts.

When installing the EH-1 into a truck or trailer with an overhead door be sure there is sufficient clearance for the door when in the open and closed positions. The grease gun holder and small rubber clamps should be attached with the pan head screws included. Attach the floor mounted handle holder using the two included lag screws. Attach the two larger rubber clamps using the two countersunk head screws included.

### **EH-1 Parts List**
